- (54) Title: PIPERIDINE DERIVATIVE, PROCESS FOR PRODUCING THE SAME, AND USE
- (54) 発明の名称: ピペリジン誘導体、その製造法および用途

(57) Abstract: A novel piperidine derivative (I) which is either a compound represented by the formula (I) (wherein Ar represents an aryl, aralkyl, or aromatic heterocyclic group which may have one or more substituents; R¹ represents hydrogen, an optionally substituted hydrocarbon group, acyl, or an optionally substituted heterocyclic group; X represents oxygen or optionally substituted imino; Z represents optionally substituted methylene; ring A represents a piperidine ring which may be further substituted; and ring B represents an optionally substituted aromatic ring; provided that when Z is methylene substituted by oxo, then R¹ is not methyl and when Z is methylene substituted by methyl, then ring B is a substituted aromatic ring) or a salt of the compound. The derivative has excellent tachykinin receptor antagonistic

activity and is useful in medicines, especially a preventive/therapeutic agent for frequent urination/urinary incontinence.
